**No-Tap Tool**

# ***The No Tap Tool***

## **Never Tap Bottom Again!**

The answer to the insert pump's most plaguing problems.

- Unique design allows pump plunger to spin and find path of least resistance
- Pump gassy fluid without pounding your pump.
- Helps pump wells with trash, sand and scale in fluid.
- Jars traveling valve at top of down stroke and beginning of up stroke.
- Jars traveling valve without damaging pump or stacking sucker rods.
- Attaches to the top of the pump without pump modifications or changes to pump spacing procedures.
- Reduces pump repair cost and sucker rod damage.
- High quality, high strength corrosion resistant material.
- 1.870" & 1.750" O.D." X 3/4" Pin & Pin.
- 1- 1/2" Plunger Travel.
- 90,000# & 72,000# Tensile Strength.

U.S. Patent 6068052 / Pending canada
