Front to Back (in.)	18.5	21.5	27.5	27.5
Sidewinder	Standard	Standard	Optional	Optional

## Load Line Containment

Quality UV resistant polyethylene  
Eliminates expensive clean up at loading and unloading areas  
Sidewinder automatically empties unit while truck is loading product  
Steel collar and saddle gives the 300, 301 and the 302 the strength of steel and the non corrosiveness of polyethylene  
Ribs have been added to the back of the units to double the strength of the steel saddle  
Units can be locked for security  
Valves can be locked inside the 302 and 303 units  
Stainless steel bolts and hinges  
Unit is designed to handle oil and saltwater  
All units come in 2", 3" or 4" collar sizes, with carbon steel standard stainless steel available on request  
PCC 303 has a 4-3/4" hole to accommodate all pipe sizes  
Taller lids available on the 302 and 303 to accommodate gate valves

**PCC Load Line Containers are available in yellow, tan or black**

**Extended Lid  
to accommodate  
Gate Valves**

**The 302 is available with the standard or extended lid**

**Sidewinder Assembly  
Standard - 300 & 301  
Optional - 302 & 303**

**Automatically empty your Pollution Control container with the sidewinder, while loading product**

**PCC Load Line Containers help with compliance of Federal Regulations for spills both inside and outside containment walls.**
