SPECIALTIES CORP.**

Odessa Separator Inc.

TUBING SCREENS

Odessa Separator's TUBING SCREENS are made up of a screen jacket that is slipped over a piece of perforated J-55 tubing. This tubing screen is designed specifically for wells with a high lifting cost associated With **Sand Failures**. Available with 0.012" to 0.050" slot openings in 8ft or 24ft lengths.

PUMP GUARD

Odessa Separator's PUMP GUARD screens protect your pump from damaging abrasives and maintain adequate open area to admit the most fluid possible without plugging. Available in 1" and 1-1/4" OD from 2ft to 8ft lengths.

SUPER PERF

Odessa Separator's new SUPER PERF is a 4ft version of the tubing screen with a 0.075" slot screen designed to replace the traditional perforated pup joint. The SUPER PERF has 27 times the open area of conventional perforated pup joints. With the 75 slot screen jacket we allow for not only greater gas separation but greater overall filtration to improve run time.
